**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/19/2006 has been entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 16-17 and 34-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Dawson et al (US 5179638).

With respect to claim 16, Dawson discloses a system that includes a analyzer configured to analyze received code data to generate image data, received data sufficient for defining the image data, a generator configured to generate additional data and a synthesizer configured to synthesize additional data with image data to output the synthesized image data wherein the additional data is encoded within the image data, (see figure 5, 30, 34 and 40 and col. 7, lines 55 till the end of the col., wherein the texture engine is read as the generator the generates the texture data read as the

additional data, shape address generator is read as the analyzer that analyze code data and generate image data using the elevation read as the "received data", and finally the rendering engine read as the "synthesizer" that combines the two in order to get the "synthesize image data") as claimed.

With respect to claim 17, Dawson further discloses the coordinate information, (see col. 7, lines 59-60, the triangles are read as the "coordinate information") as claimed.

Claims 34-35 are rejected for the same reasons as set forth in the rejections of the claims 16-17, because claims 34-35 are claiming a method for the apparatus claimed in claims 16-17.

#### ***Allowable Subject Matter***

3. Claims 18 and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

4. Applicant's arguments filed 10/19/2006 have been fully considered but they are not persuasive. Applicant argues that image data must include "the information necessary to define the image", (see last paragraph on page 5). Examiner points out that the limitations are given their broadest reasonable interpretations. And, the data generated by the tiling engine does has the image components in them granted these components may not be the real world image but does has the components or can be

displayed as an image, but adding the texture in to the tiling image does gives the final image that can be displayed.
